

The Neonatal Resuscitation Program Workshop for Providers

Come and learn about approaches to neonatal resuscitation in this interactive
1-day workshop for new and renewing NRP Providers

NRP Provider Workshop September 17, 2026 | 0800-1630 | JPCH-main floor Room M117

The Neonatal Resuscitation Program (NRP) provides health care professionals with the knowledge and skills of neonatal resuscitation. Participants must complete an online exam prior to the in-person component that focuses on the application of knowledge to clinical practice through skills checks, integrated skills practice and case based learning. The use of simulation and debriefing are prominent in building a team-based approach to care.

Who can take NRP?

Anyone who is required to participate in any part of neonatal resuscitation within their scope of practice may take an NRP course. The individual should be a licensed or regulated health professional (or student) such as physician, nurse, midwife, respiratory therapist or paramedic.

REGISTRATION - ONLINE

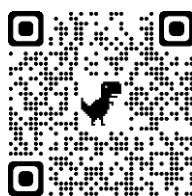

Registration link click [here](#)

For more course information and details, contact:

Suzanne Staudinger

E-mail: matchildkmu@saskhealthauthority.ca

Registration closes 2 weeks prior to course to allow
time for participants to complete required pre-learning

WORKSHOP FEE
