

SEMAC 2024 Annual Conference | Distance Learning Event

Friday, March 15, 2024					
7:50 AM	Registration				
8:00 AM	Welcome, Treaty Land Acknowledgement, Virtual Housekeeping				Dr. James Stempien
Approach to Addictions Management			By the end of this session, learners will be able to:		
8:10 AM	8:35 AM	20	Opioid Analgesia for Acute Low Back & Neck Pain (the OPAL trial)	Develop an evidence-based approach to treating acute low back and neck pain and apply critical appraisal skills to determine the quality of evidence in the OPAL trial before adopting it into practice.	Dr. Puneet Kapur
		5	Q&A		
8:40 AM	9:05 AM	20	Outpatient Management of MSK Back Pain	Incorporate new evidence regarding opioids in shared decision making with patients presenting with back pain Consider non-medical management options for patients with back pain Be familiar with different referral options for patients with back pain in Saskatchewan.	Dr. Jason Kinnin
		5	Q&A		
5 Min Break					
9:10 AM	9:35 AM	20	Anti-Craving Medicaitons for AUD	Expand their care of patients with alcohol use disorder by offering anti-craving medication prescriptions upon discharge from the emergency department.	Julia Bareham, RX Files
		5	Q&A		
9:40 AM	10:05 AM	20	OAT in the ED	Apply decision-making skills to determine whether opioid agonist treatment is suitable in specific patient situations.	Dr. Shain Thakrar
		5	Q&A		
10:10 AM	10:35 AM	20	The Golden Hour Myth: Overdose Decontamination Beyond 1-hour	Identify indications and considerations for oral decontamination beyond one hour and recognize contraindications to oral decontamination.	Dr. Riley Hartmann
		5	Q&A		
10 Min Break					
Resuscitation Pearls					
10:45 AM	11:10 AM	20	Resuscitating the Older Person in Shock	Recognize shock in an older person and apply three important points regarding resuscitating older people in shock.	Dr. Brittany Ellis
		5	Q&A		
11:15 AM	11:40 AM	20	Pediatric Respiriology Emergencies	Formulate effective care plans for children with respiratory emergencies, taking into consideration their specific needs, conditions, and circumstances.	Dr. Sey Shwetz
		5	Q&A		
11:45 AM	12:10 PM	20	Video Assisted Intubation C MAC and Glidescope Video Laryngoscopes	Identify the correct usage and functionality of both C MAC and Glidescope Video Laryngoscopes in video-assisted intubation.	Dr. William Papenfus
		5	Q&A		
12:10 PM	12:15 PM	Closing Remarks, Speaker Survey			Dr. James Stempien
In-person Simulation Workshop					
1:30 PM	4:30 PM	3 hr	Simulation Workshop - CLRC, Health Sciences Bldg	Work through simulated cases involving the medical care of critically ill and/or injured patients - demonstrate team work & communication.	Dr. Carlyn Gardner

Saturday, March 16, 2024						
7:50 AM	Attendee Sign-in					
8:00 AM	Welcome, Treaty Land Acknowledgement, Virtual Housekeeping					Dr. James Stempien
Stroke Alert ! Stroke Alert !						
8:10 AM	8:55 AM	30	Stroke Evaluation at Triage	Formulate rapid response strategies to ensure effective stroke care from the point of triage.	Ruth Whelan, RN	
		15	Q&A			
5 Min Break						
Approach to High Risk Patient Groups				By the end of this session, learners will be able to:		
9:00 AM	9:25 AM	20	ECG Interpretation	Identify different waveforms, intervals, and segments in an ECG strip and apply learned principles in the diagnosis of complex cardiac rhythms using ECG tracings.	Dr. Rajan Minhas	
		5	Q&A			
9:30 AM	9:55 AM	20	Older People Who Have Fallen: Better Care and Prevention from the ED	Recognise the morbidity and mortality of ground level falls in older people presenting to the ED, Enhance investigation and management approaches to older people that have fallen, Enhance patient outcomes through falls reduction information and initiatives from the ED.	Dr. Brittany Ellis	
		5	Q&A			
10:00 AM	10:25 AM	20	Pediatric Shock Management	Identify the different types of shock common in pediatric patients along with their respective signs and symptoms and analyze patient conditioning and response to treatment during the phases of pediatric shock.	Dr. Shannon MacPhee	
		5	Q&A			
5 Min Break						
Emergencies by Popular Demand Interactive Learning						
10:30 AM	11:10 AM	20	Orthopedic Emergencies	Perform initial assessments and stabilization techniques, then evaluate the effectiveness of initial treatment and decide on the need for further orthopedic consultation or surgery.	Dr. Elliott Pally	
		5	Q&A			
		10	Interactive Case			
		5	Q&A			
11:15 AM	11:55 AM	20	Obstetrics Emergencies	Develop comprehensive, safe, and effective care plan strategies for expectant mothers experiencing different types of obstetric emergencies.	Dr. Glennie Lane	
		5	Q&A			
		10	Interactive Case			
		5	Q&A			
12:00 PM	12:40 PM	20	Cardiology Emergencies	Analyze presentations and patient vital signs to delineate the type/severity of the cardiac condition and then adjust the treatment plan as necessary after evaluation.	Dr. Ben Leis	
		5	Q&A			
		10	Interactive Case			
		5	Q&A			
10 Min Break						
Emergency Tips & Tricks						
12:50 PM	1:30 PM	35	Clinical Management: ER Tips n Tricks	Use practical tips and tricks to make their job easier and patient care smoother in the ER.	Drs. Francois Rossouw & Ferdie Smit	
		5	Q&A			
1:30 PM	1:35 PM	Closing Remarks, Speaker Survey			Dr. James Stempien
